

The Wind

What is the Wind?
the wind is a whisper
What is the wind?
the wind is a wail
What is the wind?
the wind is a wish

How to deal with the wind

Many a fool tries to catch the wind, but such futility leads to endless frustration. Many a brave soul tries to run with the wind. But the wind can be a cyclone, a tornado, a solar burst of energy. Attempting such an endeavor leads only to insanity.

How to deal with the wind

One must live with the wind.

Everything has a consciousness; the stones, fire, water, air, machines, plastic, even the simplest forms of life.

But the wind has no consciousness. Without us (all matter) it has no existence.

The curse of the wind

When the wind is your friend
nothing can harm you
When the wind loves you
all creation loves you too
When you know the wind
you become the wind.
